## Improve your marketing performance with cleaner website traffic

### Say no to ad fraud

At least 40% of internet traffic is automated. Stop bots, web scrapers and click farms from clicking your PPC ads. Improve your ROAS, get more real customers and stop fraud in it's tracks.

### Ad security tailored to you

Monitor and block click fraud across multiple platforms. View interactions with your ads and customise your fraud filters.

### Unbeatable traffic insight and ad protection

Extensive Analytics - Get unrivalled insight into your clicks, including: device types, block reason, most clicked keywords and site visitor video replays.

## Who is really clicking your ads?

Analyse the type of traffic your ads are receiving and optimise accordingly

**Bots clicks**

At least 40% of internet traffic is non human. Bots have no intention of converting and will simply waste your ad budget

**Competitor Clicks**

What's stopping your competitors from clicking your ads, depleting your ad budget and taking the number 1 spot on Google from you

**Genuine Clicks**

Driving genuine traffic is the key to getting conversions. Blocking fake clicks improves your quality of traffic and can get you more conversions.

**Click Farms**

Are large scale dedicated click fraud operations, usually hired to inflate the click volume on search engine results and social media channels

**Brand Haters**

Refers to anyone who wants to see you fail. A depleted budget prevents you from advertising and ruins your marketing results.

### GDPR and CCPA

ClickCease is committed to protecting your data and respecting your privacy
