How does it work?

Bot Zapping is 24/7 detection and protection for your WordPress website. Our unique solution identifies and prevents bots from entering and interacting with your website by sending them to a 403 unauthorised page instead.

With over a thousand detection tests and evaluations, ClickCease makes sure to only block bot traffic so you can focus your website performance and marketing efforts on genuine customers only.

How bot traffic affects your site

27%

Of organic and direct traffic is invalid.

\$697B

Is lost globally on skewed data each year.

\$115B

In sales labor is wasted in invalid leads

Blocking bots is essential.

Bots are giving you an inaccurate understanding of your conversion rates, wasting your team's time and resources on follow-ups, and stopping you from focusing on REAL potential customers.

With ClickCease, you can now block them.

Start from as low as \$59/month
